

Application For \$50,000 Loan Approved By The Prov. Treasurer's Dept.

Mayor Tooley Informs The Tribune After Trip To Edmonton — Was Accompanied By B. F. Spicer, Took Motor Trip Through The Southern Part Of The Province.

Mayor P. J. Tooley, Frank Spicer and Father Redmond arrived home from Edmonton on Monday night. At the Capital City Mayor Tooley took up the matter with the Provincial Treasurer's Department in connection with obtaining \$50,000 at 2% interest from the Federal Government under the Municipal Assistance Act, which must be approved and guaranteed by the Provincial Government.

The Mayor stated to The Tribune that he was given the assurance that the necessary approval and guarantee would accompany the application to the financial department of Ottawa.

The Mayor also interviewed D. B. Menzies, provincial sanitary engineer, in connection with the installation of the water and sewer system, especially in regard to the plumbing arrangements.

Business over Mr. Tooley and Mr. Spicer decided to take a motor trip through the southern part of the province. On the way they visited Sylvan Lake, the first popular summer resort where they visited relatives of the Mayor, Calgary, Turner Valley, Banff and Lake Louise were also visited.

A trip along the southern end of Jasper highway to far as the road is constructed, proved one of the high-lights of the journey. This was made with the Chrysler, formerly of Grande Prairie, at the wheel. Mr. Tooley operated a sight-seeing car system at Banff.

A height of 8,700 feet was reached but no gradual grades of the high level were reached without the inclines. The glacier, which is the source of the river, was described as grand.

The Turner Valley proved interesting. Here towers shot up into the air amidst magnificent fields of grain. Little Calcutta and Little New York, which have sprung into existence since the first world war, are oil development, are busy spots, and are as busy at night as in the day time.

The Northerners were driven all through the oil fields by J. J. O'Connor of Calgary, interested in the oil development at Peace Coulee. Mayor Tooley summed up the impressions of their trip in this way:

Fire Spoils Faust Boy's Chances To Go To School
Laboriously Cuts Hay With Scythe In Order To Earn Enough Money To Take Course, Only To Have It Go Up In Smoke. A Blow-Up, Is Determined To Do It Yet On His Own Savings.

FAUST, Sept. 3rd. — The hopes of Joseph W. Stanley, of Faust, age 16 years, of going to school at Vermilion School of Agriculture this winter went up in smoke when in September last he was burned. He was depending on for the purpose was burned.

Swinging the scythe laboriously for four consecutive weeks, Joseph made hay of the grass given him on Lesser Slave Lake, and he was to put him in school this winter.

With consternation therefore word was received that the fire had burned his field of hay coils. He found the incredible thing happening and much of his hay already burned.

He was determined to carry the fire despite the greenness of the grass and stubble. But Joseph was burned and consternation: "I said I was going to finish school on my own steam, but I have had a blow-up. I am determined to put it up and go a year later," he said.

Then came an idea, may be some home or business in Vermilion would like a student to chore for his board and room which would make possible his first plan.

Mrs. Elizabeth Wilson Was Laid To Rest Tuesday

Had Reached The Advanced Age Of 88 Years — Graciousness, Kindness, Helpfulness Characterized Her Long Life — She Was Highly Esteemed In The Community.

The funeral of Mrs. Elizabeth Wilson, who passed away Saturday, September 3, was held on Tuesday afternoon. Services were held in St. Paul's United Church, Rev. A. W. Cann officiating.

The large attendance and the wonderful floral tributes, which covered the casket, bore testimony to the very high esteem in which Mrs. Wilson was held in the community. H. L. Vaughan presided at the organ.

In paying tribute to the memory of Mrs. Elizabeth Wilson, the pastor said: "One of the oldest and truest of human life is the love of life. We all do, as a least, it is a beautiful simile and has a deep significance for us. It speaks of the inevitableness of change and decay, of the gradual loosening of those which bind us to earth, as we think of the life of our departed sister we see how beautifully apt that simile is of the life of our departed sister, in her life she reflected the Christian faith. She had been brought up in the Presbyterian Church, and her training provided her with a firm faith which characterized her life. There were deep springs in her soul bringing deepness, kindness, patience, helpfulness and love into the common ways of life."

Mrs. Wilson was born in Wellington County, Ont., in 1850, where she was married. Later they moved to Quebec, and later still they moved to Hamilton, where Mr. Wilson died.

At her death, 16 years ago, Mrs. Wilson came to Grande Prairie where she resided since then. She was mother of four boys and three girls, two of whom died in youth.

The following are left to mourn the loss: Mrs. J. E. Thomson, Miss Josie Stephenson, C. W. Wilson of Grande Prairie, and E. M. Wilson of Portland and A. R. Wilson of Hamilton.

The following were the pall bearers: J. U. Hubbs, A. Dalgleish, C. B. Smith, C. B. Smith, and H. Archibald.

Burial took place at the Grande Prairie cemetery. J. B. Oliver had charge of funeral arrangements.

Spirit River Ties Hythe; Wins One In Doubleheader

If No More Games Are Played This Give Spirit River The Cup — Pat Squires Of Spirit River Knocked Out Hythe In Last Game Of The Season, And Is Entitled To Be Called The "Babe" Ruth Of The League.

Spirit River ball squad journeyed to Hythe on Sunday and clashed with the seniors of that town in a double-header league game; tying the first game, and winning the second. It is understood, although there has been no statement made, that Spirit River, this puts Spirit River one up on the season's play, and if no further games are played they are entitled to the Cup.

The first game, seven innings, ended 7-7. "Pop" Stauffer of Spirit River, who was playing effective ball sprained his ankle in the third inning and was forced to retire from the game. Nice ball was played through the entire encounter.

Spirit River's Dick and White Hythe-Bill Dick and Johnson.

Robert Cochrane, Chairman Of A Local Group Who Is Taking Over The Guardian Oil Well Near Peace Coulee Returned Home From Calgary On Tuesday Morning, By Motor Car.

Accompanied By M. W. Eagar, attorney, who is acting for the local oil men, Mr. Cochrane took up the matter of taking over the well with the officials at Calgary.

In conversation with The Tribune reporter, he said that negotiations were proceeding satisfactorily. Mr. Eagar who stopped over at Edmonton, is expected back today, (Thursday).

GOES TO HAWAII

George Robertson Acting Dominion Poultry Husbandman, at Ottawa, who will be the judge at the large poultry exhibits at the Hawaiian fair, one of the principal agricultural fairs held in the Hawaiian Islands. Mr. Robertson is widely recognized as a judge of poultry.

DIES AT VICTORIA

Mrs. L. McAuley has received word that Archie McAuley, brother of the late John McAuley, died at Victoria. He visited here some 12 years ago.

NEGOTIATIONS FOR BUYING GUARDIAN WELL PROGRESSING

Robert Cochrane, chairman of a local group who is taking over the Guardian Oil Well near Peace Coulee returned home from Calgary on Tuesday morning, by motor car.

CABINET TO MEET MONDAY BEFORE HITLER'S SPEECH

LONDON, Eng., Sept. 8.—Cabinet summoned to meet Monday. A few hours before Hitler is expected to make speech at Nuremberg, which may tell Europe's opinion in regard to Czechoslovakia crisis. The German chancellor's speech is scheduled for the evening of the 9th.

FAMOUS AUTHORESS

Mrs. Nellie McClung, of Edmonton, one of the Dominion's leading women writers, photographed as she sailed for England on the "Empress of Britain." Mrs. McClung is one of the Canadian delegates at the League of Nations Assembly in Geneva.

Lawson Creek Centre For Golfers The Peace River

Some 150 Complete In Open Golf Tournament—R. Ford, Baldoonell, B. C. Noss Out Larry Cobb Of Grande Prairie, To Win The Men's Open Championship—Mrs. Taylor, Of Peace River, Captured Junior Event.

On September 3, 4 and 5, Dawson Creek proved the mecca for golfers of the Peace River, when some 150 complete in an open golf tournament of the Peace River country.

NEW ZEALAND IS MAKING RECOVERY SAYS VISITOR

L. E. Lupton, who spent the last week in New Zealand, has returned to his brother-in-law and sister, Mr. and Mrs. Tom Crack of Peace River, as a visitor to Grande Prairie on Friday.

Mr. Lupton is retired from the Canadian Civil service and from his administrative staff of coal.

Mr. Lupton has been in New Zealand for some time, and he has been visiting his brother-in-law and sister, Mr. and Mrs. Tom Crack of Peace River, as a visitor to Grande Prairie on Friday.

In conversation with The Tribune reporter, Mr. Lupton stated that he visited this country twelve years ago and on this visit notes many changes. At that time the thriving town of Dawson Creek did not exist. Great agricultural development has taken place. One of the things that struck him was the better class hotel to be found in Dawson Creek.

In answer to a question put by the reporter, the visitor stated that Premier Savage and his government are making progress, adding that there was very little unemployment in the country, and good wages are paid for all types of work.

Mr. Lupton explained that primarily New Zealand is an agricultural country. Of late, however, several manufacturing plants have been established and the country is making progress as a self-sustaining as possible.

The production of stock costs little in New Zealand as animals graze all year round. The visitor who spent several years in Denmark, stated that the New Zealand government's reconstruction plan was largely taken from Denmark.

Mr. Lupton who will stay in this country for the first of October, will return to England via Regina, where he will visit his brother Percy, staff-surgeon of the R.C.M.P.

DISTRICT ENJOYS HEAVIEST RAIN IN LAST TWO YEARS

On Monday night Grande Prairie district experienced the heaviest rain that has fallen this last two years.

According to the local meteorological station 1.57 inch fell. The rain tanks, The Tribune is informed, which have been filled for many months, were running over.

The weather today (Thursday) has cleared and Old Sol is shining brightly, and it is thought that the threshing will be resumed the beginning of next week.

HOG PRICES DECLINE SLIGHTLY

Bacon hogs brought \$7.85 at Grande Prairie on Saturday as against \$8.25 paid two weeks ago. Four carloads were shipped from Peace River to Regina, principally for hogs and cattle.

On Way To Coast Via Monkmann Pass

mention the many who put the Monkmann Pass on the map.

"Pathfinder" Car Leaves On Historic Trip Through Monkmann Pass To Coast

Car Which Was Donated By Louis Stojan of Grande Prairie. Left Here on Saturday Afternoon With Charlie Stojan At The Wheel, Was Accompanied By Jerry Stojan And Arthur Jackson, Representing The Northern Tribune.

All primed up, with every part carefully tested, "The Pathfinder" car, donated by Louis Stojan, with his son Charlie Stojan at the wheel, accompanied by his brother, Jerry, and Arthur Jackson, representing The Northern Tribune, was driven west on the historic journey through the Monkmann Pass on Saturday afternoon.

"The Pathfinder" carried the following banner: "The Central Monkmann Pass Highway."

PEACE RIVER OUTLET TO THE PACIFIC
PRINCE GEORGE, B.C. — The car is a 1927 Model-T Ford, made into a light truck, and fitted with a ruckel axle and also carried an extra set of wheels. The car may be broken on the eventful trip.

For some time men have been working in the Pass cutting a trail through the car from the point to which the road is built.

As the car sped down Grande Prairie's main thoroughfare it attracted much attention and the party received not a few cheers.

It is planned that the party will leave tonight with the Central Monkmann Pass organization at Beaveridge, giving details of the progress made, by short wave.

Martin Swanson Of LaGlance Seriously Hurt Car Accident

Had Arm Crushed When His Car Smashed Into Heavy Truck—Was Rushed To Grande Prairie Hospital Where Arm Was Amputated—Is Doing As Well As Can Be Expected Is Latest Report.

Martin Swanson, oldtimer in the LaGlance district, was seriously badly mangled when his car collided with a big truck, that it was necessary to amputate above the elbow.

Accompanied by Art Houghton and Elmer Stave, he was driving east on Beaveridge on the highway, when the accident occurred at a point about two miles east of the Experimental Sub-station his car ploughed into the rear of a big truck, Dawson Creek, which was travelling west heavily loaded.

Swanson unfortunately had his arm out of the window which was caught by the van.

The driver of the van went some distance down the road to a crossing where he turned round and picked up Swanson and was taking him to the Grande Prairie hospital when the accident occurred.

Neither of the other two occupants of the van were injured.

Swanson is doing as well as can be expected by latest reports.

Veteran Of Great War, "Ben" Gray, Hears Last Call

Was Found Dead In Bed—Lost Arm In Battle Of Vimy Ridge—Took Deep Interest In Welfare Of His Community—Funeral In Charge Of DeBolt Branch Of Legion.

Another veteran of the Great War has heard the last call in the person of Benjamin Thomas Grey of Clarkston, Valley, who was found dead in his bed on Sunday morning at his home.

The funeral which was in charge of the DeBolt branch of the Canadian Legion, was held on Wednesday afternoon at Clarkston, where he was being held at Forbes Presbyterian Church, Rev. C. E. Fisher officiating.

The funeral was represented by members from the Grande Prairie branch of the legion present.

All that is considered at the organ. The Psalm, "The Lord Is My Shepherd," and the hymn "Nearer My God To Thee" were sung.

A British flag covered the casket. Mr. Fisher took for his text: "I have fought a good fight, I have finished my course; I have kept the faith." "Today," said the speaker, "we lay to rest one who has answered the call of duty, and we would answer the call of duty in the same way."

Continuing, Mr. Fisher observed, that Europe is armed and as in 1914 all that is needed is a flash in the pan to turn the world into another frightful war.

The war to end war did not succeed. The old warrior, St. Paul, could say that he had contended a good contest. He had finished his faith. To us, the call of the empire may sound like a dream, and we would answer and sacrifice as before.

To the family remaining the sympathy of all is extended at the organ. In concluding Mr. Fisher said: "The ranks of the returned men are growing thinner. One by one they are passing away. The last man will be laid to rest, and we would answer and sacrifice as before."

The funeral was held in the side-walk from the church to the hearse. Burial took place at the Grande Prairie cemetery.

The bearers were: Jack Grant, George, Given, A. J. McLarty, Wm. Perkins, George, Tilley and F. Tiffin.

Born at Winnipeg, Mr. Gray was in the 25th Nova Scotians as a machine gunner with the rank of corporal.

He returned to Canada in the late fall of 1917 and worked for the S.S. B. for three years, after which he went to the United States, where he was employed in the mining operations near Bassano, Alberta.

Gray came to the Grande Prairie district in 1932, together with his son Joseph and daughter-in-law, and took a deep interest in the development of his community. He served on the school board and ever fought for the rights of his district. He left a flourishing home and a large family.

Joseph, with whom he lived, is the only one of the family left. A sister, Mrs. Doris Fernside, lives at Vancouver, and several brothers and sisters live in Eastern Canada.

Mr. Gray was predeceased by his wife ten years ago.

Two Hundred Are Enrolled In The Montrose School

School at Montrose is well under way again. The attendance in the Primary and Junior Divisions, and Grade I, has increased to over approximately 185 last year to 200 now enrolled. This is about 40 less than the attendance at Montrose in the year when Grades VII and VIII were still there. To make the Intermediate Division (Grades VII, VIII and IX) these grades are now in the high school building.

The organization at Montrose has undergone some changes. On the first floor are Grades II and III, taught by Miss M. Robertson, Miss R. Robertson and Miss D. Deakin. On the second floor are Grades IV, V and VI, taught by Miss E. Deby, Miss M. Dreyer and Miss G. Freckley, principal, respectively.

To accommodate the smaller children, the music room is now on the first floor and the extra room upstairs will serve as a play-room for the Junior Division.

Miss R. Robertson will be teaching music in the Primary Division, and Miss E. Deby for the Junior Division.

MANAGER OF N.A.R. MAKING SURVEY CROP YIELDS HERE

J. M. MacArthur, manager of the Northern Alberta Railways, paid Grande Prairie a half hour visit on Thursday.

Seen by The Tribune reporter Mr. MacArthur stated that he took a way-freight as it gave him more time to study the crop situation and talk to the people.

The manager was pleased to note that the crops were far from a wash-out, and that there were some heavy yields. He did not venture to state the average bushels per acre in the Peace River valley.

While here, Mr. MacArthur called to see O. B. Harris, president of the local Board of Trade.

HOG MARKET STRENGTHENING

Sept. 8th.—Trucked in bacon \$9.00

Instructions To Exhibitors At The School Fairs

As announced last week, the dates for the School Fairs in the Grande Prairie district are as follows: Grande Prairie, September 14. Fairmont, September 15. Fairmont, September 16. Fairmont, September 17. Fairmont, September 18. Fairmont, September 19. Fairmont, September 20. Fairmont, September 21. Fairmont, September 22. Fairmont, September 23. Fairmont, September 24. Fairmont, September 25. Fairmont, September 26. Fairmont, September 27. Fairmont, September 28. Fairmont, September 29. Fairmont, September 30. Fairmont, September 31.

Due to an oversight, the names of the exhibitors at the School Fairs were omitted from the announcement. These are as follows: Mr. R. Sharp, S. Smith, and any enquiries regarding these School Fairs should be made to the school board.

In connection with the school fairs, the Board of Trade, Grande Prairie, all schools are requested to assemble for the meeting at the United Church at 2:00 p.m. on Wednesday.

Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright

"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

As this is penned threshing promises to be for most of us short and sweet.

Too many people are content to be always fighting with weeds without ever fighting them down.

Crab apples on the Substation are exceptionally well laden this year. Osman is the most prolific variety.

If the farmer knew all that lay in the bowels of the threshing machine moving on to his place and realizing the chances of wild oats, stinkweed and other impurities polluting his future crop he would shudder. The trouble is weed seeds do not appear in casual examination but their progeny show up in the years to come.

A 192-page bulletin "Trees and Shrubs in Alberta" compiled by Dr. J. S. Shoemaker, Professor of Horticulture at the University of Alberta, has just been issued from Edmonton, and is available for distribution by the Department of Extension, of the University. Himself an expert horticulturist, Dr. Shoemaker has been at pains to accumulate the names of numerous other workers in the Western provinces, to whom drafts copies were submitted for criticism and amplification. The result is a publication summarizing most that is known about both the native and introduced species of woody perennials occurring in Alberta. The relative degrees of hardness and adaptability are carefully set forth. The simple descriptions enable the layman to recognize the things described while the florist for Pelman helps the reader to recognize the scientific terms. The botanist will find keys systematic and classifications. In all, the bulletin will be invaluable to anyone wishing to decide what to plant and to learn how to grow it with the best chances of success.

Cutworms and Grasshoppers

In July R. M. White and Philip J. G. Cook, of the Dominion Entomological Laboratory, visited the Peace on an insect survey. At the end of August Mr. Cook returned to make a moth and grasshopper survey, arriving at Beaverlodge on August 26 via the Sturgeon Lake cutoff and then on to Fort St. John. Upon his return from "the Block" he was interviewed at Beaverlodge.

After examining the daily collections of the light trap installed on the Substation and also the many fields en route he reports there is evidence that a severe infestation of the red-backed cutworm is expected next year if weather conditions are favorable. The cutworms might be overwhelmed by the agencies but it would be optimistic to count upon that.

Generally speaking, the conditions favourable to the multiplication and the activity of the pest is dry weather. Fortunately, however, no other species of worms found numerous enough to cause worry, so the problem of control is simplified to that extent.

Mr. Cook also found evidence of a scattered light infestation of grasshoppers from Grande Prairie to Fort St. John, notably on the black soil. The two most common species are the roadside and the Bruner's grasshoppers. The worst trouble is to be expected along the roadside and on the margins of closely-cropped pastures, and to some extent hay fields. If the spring proves very dry some baiting for grasshoppers may be required in certain districts.

Harvesting Seed From the Garden

Why do we import such a large proportion of our vegetable seed? Much could very satisfactorily be grown here. For instance, peas will practically always mature a crop in the North Country, yet farm imports nearly a million pounds of peas annually. It would be a considerable saving, even for farm owners just enough for their own use. Then we have annual imports of approximately fifty thousand pounds of beets, carrots and radishes, also about twenty-five thousand pounds each of cucumbers, spinach, onions and turnips.

There are, however, a few rules to be followed if one is to grow seed true to variety as the varieties of many of our garden crops are bred to grow within the range of wind or insect pollination. Peas cross-pollinate very little and are one of the safest and most economical crops from which to save a seed supply. To this end small area had better be left without plucking. Gather the ripe pods and thoroughly air-dry them, and pull the vines and cure in bunches and pound out the seed with a flail. The seed must be sown in the fall, stored in sand in a frost-proof cellar, and transplanted to the garden early in spring. If this is done, cane must be taken to select healthy, vigorous specimens of good quality and type.

Radish seed may be easily gathered from spring-sown plants. It would have been better if they had been selected and spaced earlier in the spring.

Though tomatoes naturally cross, it is, to the extent of about 5 per cent, it may be said, that varieties have been grown, be worth saving seed from plants promising the heaviest and earliest crop of uniform fruit, true to variety type.

If one wishes to raise his own cabbage seed, it is necessary to select a uniform head true to type, leaving the root attached and storing in a dry, cool cellar. In the spring plant the root deeply so that the head rests half in the ground and cut the head down about an inch to help the flower stalk to emerge.

Seed of various annual flowers may be gathered from time to time as it ripens. When the object is to recover as much seed as possible, the plants may, when ripe, or when frost threatens in advance of full maturity, be harvested in their entirety and cured in tight-bottomed trays or on tarps, after which the seed may be taken out.

In a general way, these suggestions apply also to herbaceous perennials.

Seed of many trees and shrubs can be gathered in great abundance. Some of these grow best sown immediately when ripe, such as poplar, willow, maple, birch, etc. Some kinds should be picked while slightly immature, e.g., katsankon, ash and cotoneaster.

Some kinds require storage at a low temperature, for varying lengths of time. This is accomplished by holding in a refrigerator, or by a procedure which is called "stratification." By this is meant a process of seed with moist soil, sand or peat, in a box, and burying in the ground.

When the seed is buried, a process of after-ripening takes place, the favoured temperature for this process being 35° to 40° F. After-ripening is suspended by freeze-up but is re-initiated when the soil thaws until the soil temperature becomes too high. In the table beneath, the figures given indicate the number of days during which each respective species of seed should be exposed to the prescribed temperature.

35°-40° F. Therefore, it is deduced, the longer the period required for after-ripening, the more the seed in the ground must be buried, the maximum being where it is below the frost line.

Some kinds will remain in the ground for two years or more before germination is reached. Following is a list of plants whose seed requires stratification for the approximate period, in days, required for the after-ripening process.

These figures are taken from the "Propagating Trees and Shrubs for Seed" Circular No. 21, 1936, by Dr. J. S. Shoemaker.

Apple, 30 to 85 days; Apricot, 45 days; Ash, 30 days; Barberry, 114 to 128 days; Bittersweet, 120 to 140 days; Cherry, 75 to 150 days; Dogwood, 120 to 180 days; Cranberry (Pembina), 2 years outside; Dogwood, 120 to 180 days; Juniper, 1 to 2 years; Hazel, 90 days; Juniper, 100 days; Maple (fall-bearing), 120 to 75 days; Pear, 30 days; Plum, 150 days; Russian Olive, 365 days.

—John F. Moore.

The August Weather

When as in 1937 the grain crops were drying up rather than maturing normally, the situation was measurably relieved by showers which set in on 4th and brought an inch and three-quarters of rain in the first week of the month, though this does not seem to have been nearly so heavy as the rain which fell on the 4th and 5th and 6th. Daily precipitation was recorded from the 4th to the 8th and again from 12th to 23rd. While the month's total of 2.4 inches was 0.81 inch above the previous 22-year average for August there was only one rain that really soaked in to any appreciable depth, but the rain served to freshen the crop, causing straw to turn green and kernels to recommence filling. Pastures improved greatly and any stands of vegetables that persisted made rapid gains.

Temperatures were favourable though touches of frost occurred at some points on two or three occasions. On the Substation the lowest official minimum by the caged thermometer was 23.3° F. on 22nd, but on the same morning the grass minimum (exposed thermometer at ground level) was 25.5° F. and the caged thermometer at the slough read 27°.

Cucurbits, beans, tomatoes and dahlias have shown more or less evidence of frost-kill and potatoes were unsathed. Potatoes on low ground were less fortunate. A fairly stiff breeze had blown most of the night but towards morning there was a lull during which the frost probably occurred.

The month ended warm and dry with favourable weather for harvesting and threshing. Most of the cutting was done in August and the threshing was well under way at the end of the month. The mean temperature of the month was about normal. Highest reading was 84° on 26th.

THE WORLD'S GREAT NEED

If there is one commodity which the world is short today, it is enlightened leadership, states the Rotarian Magazine. The need is written in every new day's headlines. As men and citizens we should be looking ahead to vigorous and enlightened leadership for tomorrow. And from whom will we get it? From the ranks of healthy, normal boys, the sons of good parents, the products of the hard-earned advantages of our civilization?

CHOICE HARDY TREE FRUITS

(Experimental Farms News)

In testing upwards of a hundred varieties of tree fruits during the past winter, the greatest success was obtained at the Experimental Station at Scott, state G. D. Matthews, the Superintendent, has selected a desirable quality has proved to be hardiness.

Hardiness in fruit trees is the ability to withstand the effects of severe cold, intense heat and drought occurring in the prairies. A combination of a dry summer and a cold winter with little snow has proved particularly disastrous to promising introductions. Many specimens tested have survived well until the trees had started to bear fruit, but fruiting caused drain on the tree which resulted in winter-killing during the following winter.

Certain precautions are necessary to help protect trees against these natural hazards. An effective shelter for trees lessens cold, gathers snow to add moisture, often prevents wind damage and lessens evaporation. Clean cultivation in the orchard provides the best possible chance for growth. Encouragement of bush formation in growth of fruit trees aids in gathering snow, helps protect from sun shining on the trunk of the tree.

In favorable years and with proper care, trees can be expected to continue to grow after midsummer, ripening of the wood will be aided by pinching one or two inches from the tip about the second week in August.

In choosing hardy varieties the following have proved their value in this respect: Crabapples—Garnet, Florence, Prince Albert, Robin, Ananas and Rescue, Plum—Assiniboine, Mammoth and Ojibwa, Plum and cherry hybrids—Opata, Sapa, Oka, Tom Thumb and Champa.

For further details on adapted varieties the grower should consult the nearest Experimental Station or university.

RAW FURS VALUE

The value of Canada's production of raw furs in the season 1936-37 (12 months ended June 30, 1937) is placed at \$16,666,375, compared with \$15,444,883 in the preceding season. These totals comprise the value of pelts of fur-bearing animals taken by trappers and pelts sold from fur farms, the value of the latter representing approximately 40 per cent of the whole. The total for the 1936-37 season is the highest recorded since the 1928-29 season.

SALT SHORTAGE CAUSES A DIFFICULT SITUATION FOR NEWFOUNDLAND FISHERMEN

Refusal of Spanish Insurgent Government to allow a Russian steamer to enter port at St. John's, Newfoundland, has caused a difficult situation among the Newfoundland fishermen.

The Gulf of St. Lawrence is to bring more than 30,000 head of salt to St. John's, Newfoundland, but the salt added to the difficulties of the fishermen, as they are unable to use the salt to preserve their catch.

The salt is being used for other purposes, and the fishermen are unable to use it to preserve their catch.

A SPECIAL TRIBUNE FEATURE
THE BEST OF THE WEEK'S INTERESTING NEWS PICTURES

FAMOUS GILBERT AND SULLIVAN OPERAS "SUCCUMB" TO THE MOVIES

The countless thousands of Gilbert and Sullivan opera enthusiasts throughout the British-speaking world will, no doubt, be interested to learn that their favorites are now being filmed by a British studio at Iwer, Bucks. This picture, taken during the filming of "The Mikado" shows The Mikado (Mr. John Barclay) and Katisha (Miss Constance Willis) at the right, while the charming maidens, left, and Ko-Ko plead for their lives.

ENGLISH DINGHY SAILORS ARRIVE FOR INTERNATIONAL RACES

The above group of English dinghy sailors, photographed on the deck of the Empress of Britain will compete in the International Dinghy Races at Toronto this week. Led by Peter Scott (centre) son of the late British explorer, Captain Robert Falcon Scott, these sailing experts race their 14-foot dinghies in front of the Canadian National Exhibition. Left to right: Keith George, Major Colin C. Smith, James Slewith, Peter Scott, Ian Milne, Charles Currey and Michael Bratby, manager of team.

VACATIONING IN VENICE WITHOUT HER COUNT

Countess Barbara Haugwitz-Reventlow, the former Barbara Hutton, is pictured (the second from left) as she attended a movie in Venice, where she is vacationing, with Count Ciano (left) the Italian Minister of Foreign Affairs. At the right is Edda, Ciano's wife and daughter of Premier Mussolini. Count Reventlow visited his wife in Venice recently, but left without the reconciliation it is felt, he had hoped for.

LEWIS SEEKS AUTO UNION TRUCE

Attempting to heal the breach between officials of the United Automobile Workers Union, John L. Lewis, right, chairman of the C.I.O., confessed with Homer Martin, president, in Washington, after discussing the situation with four officers suspended in June for alleged disruptive tactics.

Alaska Uses Frozen Bread

Practical use of frozen bread is reported from Fairbanks, Alaska. Freshly-baked bread is quick-frozen at 20 degree F., and is then shipped by train or aeroplane to retail distributors who store it in quick-frozen condition until the consumer requires it to be defrosted.

Ontario is the source of 83 per cent of the rubber goods, including footwear, produced in Canada.

WHAT HE DISCOVERED

A public opinion research expert, Sanford Griffith of New York, gave these characteristics for the average American:

Gives up necessities rather than luxuries during a depression. Values personal attention by sales people 10 times more than style and 20 times more than quality.

Wishes his "tastes" in literature and the arts were higher than they usually are.

CATTLE EXPORTS HIGHER

The number of Canadian cattle exported to the British Isles during 1938; up to August 4, was 24, 834 head, as compared with 5,520 in the corresponding period of 1937. The cattle exports to the United States up to August 4 were 29,138 beef cattle, 5,913 dairy cattle, 32,509 calves, and 95 hogs.

THE LATEST ROBOT

Percy C. Osteen, theatre-manager for 19 years in Anderson, S.C., has invented a machine which automatically takes, records, and destroys show tickets.

Three years ago, with the assistance of his son, Harry Osteen, the inventor built the first miniature model in brass, and in October, 1935 carried it to Washington for the purpose of patenting it. Since then he has patented improvements so that the machine has been completed and is installed in the Osteen theatre. After being subjected to a thorough work-out under actual operating conditions, the device will be placed upon the market.

NO USE FOR REVOLVERS

The average law-abiding citizen of Canada would no more carry a revolver in his hip pocket than a stick of dynamite. It simply does not occur to him that when he goes touring he should carry such a weapon in the pocket of his car. Far too many revolvers are privately owned, but great numbers of them are war souvenirs probably not discharged in many years. The situation in the United States is quite different. Any proposal there for real control of revolvers and pistols arouses resentment and a strong opposition. In most States it is lawful for men to carry revolvers, and a common practice. Ottawa Journal.

FRANCE SAYS "WORLD'S PRETTIEST"

Miss Ellen Flouest, 19, a Paris secretary, is pictured after being chosen "the most beautiful girl in the world." We agree that the French have chosen a charming beauty queen, but our friends to the south think "Miss America" has a right to the "world's prettiest" title.

STILLMAN HEIR ON HONEYMOON

Marriage at Dundee, Ill., climaxed a childhood romance for Guy Stillman, 18-year-old son of James Stillman, New York banker, and Nancy Holbrook, 17, of Barrington, Ill. The two were next door neighbors and playmates through childhood. The bride was graduated from high school in June and young Stillman is still a student in college.

NEW GOVERNOR

Sir Harry Luke, C.M.G., recently appointed Governor of Fiji and High Commissioner of the Western Pacific photographed on the Empress of Britain at Quebec en route across Canada to take over his new duties. Sir Harry has just completed a term as Lieutenant-Governor of Malta.

SIR ROBERT DALTON

His Majesty's Senior Trade Commissioner in Australia and one time Senior Trade Commissioner in Canada, photographed as he arrived in Montreal on a visit to the Dominion. Sir Robert said that lower wool prices of last year had led to much "quieter" trade for Great Britain in Australia this year.

TOURS CANADA

Sir Harry Lindsay, K.C.I.E., director of the Imperial Institute, who has arrived in Canada to speak before Canadian Rotary and Kiwanis Clubs on the work of the Imperial Institute.

MARCUS GARVEY

President of the Universal Negro Improvement Association, photographed as he sailed from Quebec on the "Empress of Britain." Mr. Garvey stated during an interview that the "God of Harlem," Father Divine is an unwitting tool in the hands of rich white men who are using him to irritate President Roosevelt.

BRITON AND HIS CINDERELLA

This is the first picture showing Vivian (Kiki) Oster, member of one of England's wealthiest families, with his bride, Pauline Spak of the Bronx, N.Y., who became Judy Puck, floor show dancer after selling cigarettes at the Hollywood restaurant in New York City. Oster's father is chairman of the Board of Gaumont-British.

PAINTS TO PAY BABY BILL

Harry Vost, 31, and unemployed, is shown painting the 50-foot flagpole atop the Hahnemann Hospital, Philadelphia, to pay the bill for his baby's birth there. Soon after this picture was taken the rope snapped, injuring Vost.

"What induced you to have a gramophone record made of your wife's voice?"
"It's such fun shutting it off when I like."
—En Rolig Timma, Sweden

"I am pleased to see you. How is your husband?"
"But professor, I'm not married."
"Dear, dear, then your husband is still a bachelor?"
—Schweizer Illustrierte, Zofingen

Wedding Bells

BOWEN-HAMILTON

The beautifully decorated Anglican church at Whitehead was the scene of a pretty wedding on Wednesday, August 31st, when Miss Mildred Irene, daughter of Mr. and Mrs. C. G. Hamilton, became the bride of John Craig, son of Mr. and Mrs. Jas. E. Bowen of Grande Prairie.

The bride, who was attended by Miss Grace Wishart of Grande Prairie, was given in marriage by her father. Misses Colleen Reid and Nan Lyons were flower girls. Rev. Prior of Fairview performed the ceremony. Mr. Lloyd Bowen, brother of the groom, was best man. Miss Muriel Caldwell of Grimshaw played the organ.

After the ceremony, a reception was held at the home of the bride's parents. The young couple motored to Grande Prairie where they spent a few days visiting friends before leaving for Edmonton, where they will reside.

LIGHTNING BOLTS RECORDED

A machine which records lightning bolts as they scratch across the sky, is being used by the Western New York's next electrical storm on paper.

Every lightning bolt within 15 miles of Buffalo is recorded on a device constructed by the Niagara Power Company. It enables experts to tell how the company's equipment holds up during electrical storms.

The machine can be used to forecast the approach of the storm by picking up bolts at distance. During a terrific thunderstorm in Buffalo it recorded 2,200 bolts in the area, the highest number on record. The previous high was 1,000, recorded a year ago.

But it's "picked up" on an antenna similar to that on a radio.

NEW CBC STATIONS

TO RECORD ARTISTIC REGIONAL RESOURCES

("Chatting with the Listener")

HALIFAX, Sept. 7.—Further development and expansion of the CBC so that the artistic resources and regional character of the Atlantic provinces may be worthily reflected when the Corporation's new 50,000-watt transmitting stations for these regions are completed, was revealed by Gladstone Murray, CBC General Manager, during an address broadcast over the national network from Halifax, N.S., Monday.

Mr. Murray, speaking in the "Chatting with the Listener" series, announced that the new Maritime Station, CBA, is being constructed at Antigonish, N.S., and that the surveys that will determine the site of CBC's Prairies station, are nearing completion. The inauguration of these plans will mark the completion of CBC's second instalment of the national plan for high-power coverage. The first instalment was completed last year with two 50,000-watt stations at St. John's, Nfld., and Toronto, Ont.

IMPERIAL OIL CO. SHOWS DIORAMA TURNER VALLEY AT TORONTO EXHIBITION

Western Canada's grain, long a favorite feature at the Canadian National Exhibition, is being privately

elbowed aside by a precocious

younger brother this year who has

taken much of the spotlight

attention in one of the most elaborate and

comprehensive exhibits ever erected

at the Exhibition.

Turner Valley, heralded as the

greatest producing area in the

Empire, forms the central theme of

an exhibit that presents a collection

of miniature working models of

mining, drilling and oil production

equipment, and replicas of the

Valley which are valued at \$65,000.

Paramount among these is a di-

orama of Turner Valley which shows

in an upper section the foothill coun-

try, dotted with tiny derricks, and

in a lower section a cross-cut of the

sub-surface, revealing the formation

as reconstructed by geologists. As

a synchronized voice describes the

each, lights alternately illuminate

each section to direct the observer's

attention to different features.

More than 10 million visitors are

expected to see the exhibit, accord-

ing to the estimate of Exhibition

officials. The exhibit is housed in

entire wing of the Automotive build-

ing and includes a lounge-lobby

where visitors can sit and watch

the action display. These include

complete scale models of

horizontal and cable drilling rigs,

the former's derrick towering 14-ft.

high, and the latter's complete

bits, drills, casing, pumps and

other details exactly in propor-

tion.

Object of the exhibit, according to

officials of Imperial Oil which erect-

ed the exhibit, is to demonstrate

developments in Turner Valley dur-

ing the past two years and to inform

visitors of the Dominion Govern-

ment's policy in regard to oil and

gas. The exhibit is a masterpiece

of engineering and art, and is

designed to attract all types of

visitors. It is a masterpiece of

THE WORLD OF WHEAT

By H. G. L. Strange

Director "The Crop Testing Plan."

The Prairies can still produce

in spite of the drought. Normal rains

this season will almost everywhere,

and wherever good rains occurred,

average yields appeared, even in the

drought and soil-blown areas.

Now, however, for the first time

in 61 years, a much more serious

problem faces us. Can we

sell the wheat we produce?

First to improve the quality of our

wheat, and secondly for all of us to

reduce to drive unseasonably to per-

suade the Dominion Government to

Bird's Grocery

CASH AND CARRY

The Preserving Season will soon be over, but we have just received ANOTHER CAR containing a Fresh Stock of Okanagan

Fruits and Vegetables

This will be your last chance to buy Peaches, Bartlett Pears, Plums and Italian Prunes while the Quality and the PRICES ARE RIGHT.

At the 19th Hole

All final games in the club tournament at Richmond Hill golf course will be played off on Sunday. Larry Cobb and Len Duffield will battle for 36 holes in the men's section, and this will no doubt be a good match to witness, as both players are at the top of their form. In the women's section, Stevenson would like to see a record crowd on hand to witness this match.

Dawson Creek

(Continued from Page One)

up and two to go. Larry had an opening at the 17th when Ford was over the green with his third, but Larry just made the sand and left himself a long putt. Ford placed his fourth about four feet from the hole and Cobb missed his putt to win the match. They halved the 18th. At this stage of the game Cobb was still one up, but at the tenth hole, Cobb was penalized for improving his lie, and the committee decided that another nine holes be played, starting all square.

On the extra nine holes the match went to the seventh with Cobb leading one up and two to go, but the 17th was halved. On the ninth hole Cobb missed his putt and Ford was pin high in the rough at the left of the green. Cobb was short with his second and left a long putt after his third. Ford pitched out of the rough and missed his putt. Cobb missed his fourth and Ford missed his for a four, making the match all square again.

On the extra hole, Ford got a beautiful drive in the clear, but Cobb unfortunately got in the rough to the left with a long drive. He played his second, but was still in the rough unplayable and had to lift and play his fourth. Ford played his second pin high to the right of the green.

Murray. The final was won by M. Kruse, against Sather. Results in the ladies' events are as follows:

Ladies' Championship
The fours were Mrs. Fleming, Mrs. Taylor, Mrs. Clark and Mrs. Ryan. Mrs. Taylor won from Mrs. Fleming, and Mrs. Clark lost to Mrs. Ryan. The final was won by Mrs. Taylor from Mrs. Ryan.

Ladies' First Flight
The fours were Mrs. Baldwin, Miss P. Fynn, Mrs. Morrow and Mrs. Anderson. Miss Fynn won from Mrs. Baldwin, Mrs. Morrow won from Mrs. Anderson. The final resulted in a win for Miss Fynn over Mrs. Morrow.

Ladies' Second Flight
Miss Poppin and Miss Myers held the final brackets. Miss Myers winning after a close match.

Championship Consolation
The fours were Mrs. Newby, Mrs. B. Harper, Mrs. W. R. Roberts and Mrs. Hutton-Potts. Mrs. Newby won from Mrs. Harper, Mrs. Roberts won from Mrs. Hutton-Potts. The final was won by Mrs. Roberts lost to Mrs. Newby.

Consolation First Flight
Mrs. Neilson in the fours (the latter was not present). Mrs. Edgar and Mrs. Sinclair won the first half of the fours. Mrs. Edgar won from Mrs. Sinclair. In the final game Mrs. Edgar won from Mrs. Poppers.

Consolation Second Flight
The finals were played between Mrs. Hawdon and Mrs. D. Linklater, the latter losing after a close game.

M.P.H.A. Broadcast Over CFPG For This Week

By J. O. JOHNSON

Hello everyone listening-in and especially the old-timers of this country and supporters of this project. I wish to congratulate CFPG on the very good work they are doing in this Peace River country. This Association appreciates the support they have given to this project.

In the early days I helped my father cut many trails from Lake Saskatoon west and today some of this early trail blazing forms a link in the Peace River Highway between Lake Saskatoon and the Peace River.

The final was won by Harper from Cobb in the final.

Men's Championship Flight
The four brackets were filled by C. Lyness, R. Ford, G. Duncan and Larry Cobb. Ford won from Lyness and Cobb from Duncan. Ford won from Cobb in the final.

Men's First Flight
P. Newby, W. O. Harper, A. B. Campbell and W. Stewart reached the fours. Newby won from Harper, Campbell won from Stewart. In the final Newby won from Stewart.

Men's Second Flight
Those reaching the fours were L. Levesque, J. H. Simpson, Bert Harper and H. J. Harrison. Simpson won from Levesque, Harper from Harrison. The final was won by Harper from Simpson.

Men's Third Flight
In the fours were F. Temple, A. Pelletier, D. W. Pratt and C. C. Fleming. Temple lost to Pelletier, Pratt won from Fleming. The final resulted in a win for Pelletier from Pratt.

Championship Consolation
The fours were F. J. Orme, F. Donald, Frank Ryan and B. Schields. Donald won from Orme, Ryan won from Schields. Ryan won from Donald in the final game.

Consolation First Flight
The fours were D. Linklater, M. Lewis, M. Goodrick and L. McIntosh. Linklater won from Lewis, Goodrick won from McIntosh. The final was won by Linklater from Goodrick.

Consolation Second Flight
The fours were A. Wishart, E. Johnson, B. Harper and H. Morrow. Wishart won against Johnson, Morrow won from Harper. In the final game Wishart won from Morrow.

Consolation Third Flight
The fours were M. Kruse, R. Boal, J. Sathers and D. Murray. Kruse won from Boal, Sathers won from Murray.

A.Y.F.A. Meeting

A representative gathering of the members of Christ Church A.Y.F.A. met in Speke Hall on Wednesday evening for the first meeting of the 1934-35 winter season.

Bill Lowe, vice-president, was in the chair and after disposing of the general business, introduced the guest speaker for the evening, Rev. Harding Priest, B.A., Western Field Secretary of the General Board of Religious Education.

Rev. Priest gave a very interesting and illuminating talk of the two recent world conferences which he had attended at Oxford, Edinburgh, and Edinburgh, Scotland; laying emphasis on the need of informed intelligent Christian youth on the part of our young people today.

He outlined methods and materials for discussion groups on the relation of Christianity to present day problems of economics and sociology. He mentioned the fact that all youth organizations in the totalitarian state are suppressed today as they are to Canadian youth who still possess the right of free speech and assembly to use their rights to build a Christian Canada.

TRIBUTE CLASSIFIED ADE. BRING RESULTS

HUALLEN NEWS

Bobby Mitchell of Glen Leslie paid a visit to his old stamping grounds in Hualle. He was visiting at the home of his former school pal, Bill Clow, during the latter part of school vacation.

Visiting at Dave Mackintosh's down at Aspen Dale last Sunday were Mr. and Mrs. Bud Dewar, the Rev. J. MacIsaac, Agnes MacIsaac, Bob Dewar of Appleton. A very pleasant time was spent which included a hike to the Forks and a picnic lunch.

Anglican Church services were held in the Aspen Dale school last Sunday afternoon and there was a good attendance. The new rector, Rev. Mr. Sandcock has a pleasing personality and has already endeared himself to his new flock. Harvest Thanksgiving services will be held Sunday, Sept. 16. A welcome is extended to all.

Miss Martha Hemming has assumed duties as teacher at Aspen Dale which opened for the fall term last Thursday. Miss Leaver Lodge, the new teacher is Miss Edith Leitch, while Miss Edna Stokke has the Kildyke Trail school. Miss Moir who taught at Mountain Trail last year is also back again.

BETTER THAN EXPECTED
Yields by farmers in the Peace River show yields are better than expected in many cases. Fred Dolphin had a good crop of wheat, 30 bushels per acre and another of Red Bobs 30 bush. A heavy rain Tuesday has stopped the crops.

GO TO TRAIL LINES
Ted Thomson and Eddie Schadeck left Tuesday for their trapping grounds at Two Lakes in the mountain district south of here.

Dan Willey accompanied them with his grubstake and trapping outfit.

After spending a very pleasant holiday at the home of his brother, Wm. Kirkpatrick, of Frank Madill and little daughters, Jean, Joy and Shirley and son Keith, of Bowman, Mr. Ted Thomson left for his trail line on Tuesday.

Herb Pryke, who is leaving this fall for England, is having a sale of his household goods. He will be the auctioneer. Hold all your bawbees and give Herb a sale.

Dance at the hall Sept. 16th. The Vagabonds Orchestra.

HEARD AND SEEN:
That G. MacIsaac wanted to go to the Kirk last Sunday, "darkey" making his entrance via the window, Dan and Anne out looking at the wheat to see if it was ready to thresh. Leaver Lodge climbing his horse. The Cochrans with another jockey.

VALLEYVIEW NEWS

VALLEYVIEW, Sept. 6th.—We have had grand weather for the cutting and threshing. I believe most of it is completed. Oscar and Gus being first as usual.

We think the government will have to build wider roads or shallower ditches for the late travelling cars.

Harry Grey and Paul Werkund commenced cutting Monday, Harry reports a bumper crop.

Mr. and Mrs. Jack Williamson are being on the arrival of a nine pound boy, Leonard MacGregor. Mother and babe doing fine in the Grand Rapids Hospital. She will be home in another week we expect.

A dance was held in the hall on Saturday night, with a small attendance. We hear whispers of a good dance to be held in the near future, in aid of the Monksman Pass Highway. We all hope it will be a huge success. It is a worthy cause.

Water is scarce in Valleyview and the wells are very low. At this time water is being pumped out of the wells to the town of Carleton Place. We are grateful thanks to Carl Svenson for his kindness and forbearance in the use of his well under trying circumstances.

Mr. Robert Harmon has arrived from Edmonton and will take charge of the Calais School. Bob has already made many friends.

Mrs. G. Holmstrom was hostess this week when she entertained for her two daughters, Elsie and Grace, the occasion being a birthday party.

We had a soaking rain all night and every housewife was busy catching all the welcome water. The late threshers may not like it so well.

TRADE RETURNS BETWEEN DENMARK AND CANADA NOT VERY ACCURATE

One of the cases where statistics may be misleading is to be found in the trade returns between Denmark and Canada. In Denmark, statistics are based on the country of purchase. Most of the Canadian wheat imported into Denmark is for export to the United States. According to Canadian statistics the Danish returns to Denmark were valued at \$1,088,507 for 1933 which is approximately twice the amount returned to the Dominion in the Danish returns—Department of Agriculture.

THE INDIAN LANGUAGE

Apparently, even in the far north, the Indian is losing his language and adopting English, says the Seattle Star. There may be isolated tribes yet which are not yet influenced by English, but this is doubtful. The Seattle Star is dependent on the outsider that they can hardly escape soon losing their old ways of life and with the loss of their unwritten languages the Indian is bound to ring down on the tribes that have for ages preserved a strong individuality.

Thirty-four per cent of the world's copper resources are in Chile. The United States has about 20 per cent.

The phororhacus, an extinct Pangean bird, had a skull as large as that of a horse.

Paragraphs of Personal Interest

Bob Nash of Edmonton is holidaying at Grande Prairie.

Mr. Ben E. Plummer, Jr., of Passano, is visiting with Mr. and Mrs. R. E. Easterbrook.

Roger Salda of Tupper and Geo. Leyha of Lynnburn were callers at the Tribune office last Monday.

N. W. Gilliland and A. Wright were passengers on Friday's train enroute home to Dawson Creek.

Paul Guy, announcer at CFPG, is back on the job after a few weeks vacation.

Joe Martell, of Gordondale, was a business visitor to Grande Prairie on Thursday.

Jack Findland and Sherman Carson of Hythe were visitors to Grande Prairie on Monday.

J. M. Murdoch of the Dominion Trust Branch is on his annual inspection tour of stock in the Peace River.

J. Prasse and son, "Gus," of the Peace Couper district, spent Sunday and part of Monday at Grande Prairie.

Capt. Wilfred Baker, of Calgary, and E. J. Eganley of Edmonton, representing the Deliveries Ltd., were weekend visitors at Grande Prairie.

The Women's Association of St. Paul's United Church will meet at the home of Mrs. A. R. McMillan on Wednesday, September 14 at 3 p.m.

Mrs. T. Clark, of Berwyn, spent Sunday and Monday at the home of Mrs. Clark, a guest at the Donald Hotel.

Phil Pitt of the office staff of the Vermilion School of Agriculture is visiting at the home of Mrs. A. R. McMillan and Mrs. A. R. of Grande Prairie.

C. R. Demers of Edmonton, representing the Relief Settlement Department of the Provincial Department of Agriculture, arrived here Tuesday to cover the district for his company.

Mr. and Mrs. Dave Watson, of Edmonton, who are visiting Mrs. Watson at the home of her son, Dan Cooke for the past week, returned home on Tuesday's train.

Mr. and Mrs. John Smith, of Lake Saskatchewan, were visitors to Grande Prairie last week. They reported that their trip was nothing to cable to Europe about, but they were not complaining.

Morgan French with Nash & Nash, returned from a trip to the coast on Wednesday morning. During his visit he visited the home of the late Mr. French and the thrilling experience of being forced to leave his car near DeBolt on his way home.

Joe Tracie and Ike Adams of the Sixsmith district were business visitors to Grande Prairie on Friday. They were on their way to the coast, he didn't have a worry in the world, for the reason that he refused to worry.

D. Fraser and J. Bumpf, of McLennan, were passengers on Tuesday's train from a vacation trip to the Ft. St. John country. In conversation with The Tribune reporter, they stated that their objective was to visit the old logging camps, owing to difficult roads had to turn back at the Halfway River.

Rev. and Mrs. G. A. Skitch and sons, Gordon and Paul, of Calgary, accompanied by Miss Verna Skitch of Ft. St. John, spent a short time at Grande Prairie on Monday, enroute home. Mr. Skitch held several meetings in the district, representing the use of his well under trying circumstances.

BUMPERS USED AS AERIALS
Police in radio-equipped scout cars will literally be able to carry on conversation with police headquarters through the rear bumper of the automobile in which they are cruising, as a result of a new antenna system developed in the research laboratories of the General Electric Company at Schenectady, N.Y.

The new antenna system uses the auto bumper as a radio transmitting aerial. According to the inventor, George W. Fyler, the rear bumper makes a more efficient aerial for broadcasting than the conventional running board, vertical and roof aerials heretofore used. The bumper, when used as an aerial, sends out the radio waves more nearly uniform in all directions, so that the signals can be picked up from all points by other scout cars or police headquarters. Another feature is that the bumper aerial is that it is inconspicuous. It does not "give away" the criminal the fact that the police car is equipped with a radio transmitter.

EXPERT PIANO TUNING

It will pay you to have your piano tuned, regularly cleaned and de-mothed, before beginning your musical career.

I give you the service at the usual price of tuning.

I have some good buys in used pianos. Give prospective buyers should investigate.

DUTY OF A NEWSPAPER IS TO PROTEST AGAINST WRONGS SAYS VANCOUVER EDITOR

W. L. MacTavish, editor of the Vancouver Daily Province, told the annual convention of the Canadian Weekly Newspaper Association that it was the business of editors to see there was no shadow of truth in the radical's sneer at the "capitalist press."

MacTavish said that newspapers ought to call for the conviction that it was the most satisfactory economic system yet evolved in the present state of the world's progress, and added:

"Let it never be said of us that we have lost the power of protest against the editors of the capitalist press have forgotten its weaknesses and ceased to fight against its injustice and inequalities."

The struggle of the free press was fought largely for the freedom to speak out the wrongs and woes of the underprivileged, he said.

"Journalism is a profession of protest. It is our calling to search out that which calls for protest in the conditions of our world and to voice that protest on behalf of those who are otherwise voiceless," he said.

In the service of humanity was due to the successful outcome of that struggle, he said. The great men of our calling have left us with a heritage in the form of a record of usefulness to the world.

"I think that perhaps the greatest danger to the newspaper is that in achieving a degree of material success we will lose the crusading spirit which is the hallmark of worthy journalism."

MacTavish told delegates they could find scope for crusading "in your own province and your own Dominion."

Newspapers in many countries are the world's most powerful force in the true sense of the word because they are the only force that can control the mind.

Here and There

The opposing sides in Spain have accepted a three-man British commission to mediate an exchange of prisoners.

Since her maiden voyage in June, 1933, the French liner Normandie has crossed the Atlantic more than 100 times and carried 230,137 people.

The record round-trip flight to New York by the German airliner Brandenburg may be followed soon by a round-the-world flight.

The death of John Materson, 78-year-old uncle of Lord Tweedsmuir, governor-general of Canada, has been announced. He died recently at Broughton, Peebles, Scotland.

Due to a widespread scarcity of leather, Japanese bicycle riders have received permission to wear wooden clogs as a substitute for shoes.

One of the oldest women in Nova Scotia, Mrs. Margaret Mackenzie of Westville, celebrated her 100th birthday at the home of her son, Dan Mackenzie.

Anthony Eden, former foreign secretary, will be the principal speaker at the annual meeting of the Peace Society of the Guildhall, October 18, it was announced.

The United States treasury announced the seizure of a Brooklyn pier of the single shipment of illicit opium in more than a decade. Officials said the quantity seized was valued at \$600,000.

Prime Minister Mackenzie King, who has been busy at his official duties in Ottawa throughout the summer, faces an equally busy autumn and will delay his proposed visit to Western Canada until October at the earliest.

D. Fraser and J. Bumpf, of McLennan, were passengers on Tuesday's train from a vacation trip to the Ft. St. John country. In conversation with The Tribune reporter, they stated that their objective was to visit the old logging camps, owing to difficult roads had to turn back at the Halfway River.

Rev. and Mrs. G. A. Skitch and sons, Gordon and Paul, of Calgary, accompanied by Miss Verna Skitch of Ft. St. John, spent a short time at Grande Prairie on Monday, enroute home. Mr. Skitch held several meetings in the district, representing the use of his well under trying circumstances.

BUMPERS USED AS AERIALS
